Summary

Second-year CS student at BITS Pilani and Scaler. Founder of MedOut. Experienced in building AI-powered platforms, automation systems, and backend services. Skilled in data-driven problem solving, cross-team coordination, and operational efficiency. Strong interest in tech-enabled workflows and student-facing processes.

Skills

Programming Languages: Python, Java, SQL, Javascript

Backend/APIs: FastAPI, Node.js, Express.js, REST APIs

Frontend: React.js

Cloud and Tools: Azure, GitHub, Supabase, Vercel, CI/CD

Data & Ops Tools: Excel (advanced), SQL, Notion, Analytics dashboards

AI/LLMs: API Integration, LangChain, Hugging Face, RAG pipelines

Soft Skills: Clear communication, Stakeholder management, Problem solving, Leadership

Others: System design (beginner), DSA, UX/UI

Projects

Aistra – Automated workflow platform helping businesses streamline daily operations.

Mentora – Platform enabling structured interactions between students and industry professionals.

Orbix – Intelligent unified storage system with optimized data handling.

Key Achievements

Full Stack Development – Built multiple full stack applications within one year in fast-paced environments.

AI Tools – Developed automation and AI-powered systems for data handling, insights, and process efficiency.

Experience

Aspire (SST Incubator Program)

Feb 2025 – Apr 2025

Backend Developer

Developed a FastAPI backend enabling SMBs to analyze business problems and access curated resources.

Leadership Development Club, Scaler School of Technology

Apr 2025 – Jul 2025

Core Member

Organized leadership initiatives, managed communication, and coordination across multiple teams.

MedOut

Jul 2025 – Present

Founder

Building a healthcare platform aimed at reducing hospital discharge time through digital workflows.

Education

B.Sc. Computer Science — BITS Pilani, Scaler School of Technology
